

THE AMERICAN JOURNAL OF TROPICAL MEDICINE AND HYGIENE

NOTICE TO CONTRIBUTORS

Manuscripts should be sent to the Editor, W. D. Tigertt, 15 Charles Plaza—Suite 2202, Baltimore, Maryland 21201, USA. Queries concerning reprints should be addressed to Allen Press, Inc., 1041 New Hampshire Street, Lawrence, Kansas 66044, USA.

*Manuscripts* should be typewritten in *English on one side of the paper* and submitted in **duplicate**. The **required** size of sheet is  $8\frac{1}{2} \times 11$  inches. *Double spacing* should be used throughout the manuscript including in the list of references, tables, footnotes, figure legends, and quotations. Tabular or other material that has been reduced by xeroxing is not acceptable.

The following should be supplied: (a) a short title of not more than 50 letters for use as a running head; (b) the full title; (c) authors' names and affiliations; (d) footnotes; (e) address to which proofs are to be sent; (f) a concise, informative abstract; (g) list of the references cited; and (h) legends for the illustrations.

*Tables* should be typed each on a separate sheet and numbered serially in Arabic numerals. They should be designed for printing in 1-column width if possible, and should never require more than full-page width.

*Illustrations.* Graphs, drawings, and photographs illustrating specific points should be numbered and each should be cited in the text. Only glossy photographic prints or drawings in black India ink on white drawing paper or tracing linen can be used. Plates should be planned for a maximum page size of  $5\frac{1}{2} \times 8$  inches, including space for the legend to be placed below the figures. One of the two sets of illustrations should be unmounted. Text figures should be suitable for reduction without loss of legibility to a 1-column width of  $2\frac{3}{8}$  inches, or with good balance and legibility when printed at page-width of  $5\frac{1}{2}$  inches. Color illustrations can be reproduced only at the expense of the author. Material for illustrations should be protected with cardboard; the back of each should bear the figure number, name of senior author, and an arrow indicating the top of the figure.

*Legends* should be separate and not attached to, or written on, the illustration copy.

*References* should be cited by consecutive numbers in the text. The numbers should not be enclosed in parentheses and should appear *after* any closing punctuation. The reference listing at the end of the article should be consecutive, without regard to alphabetical arrangement. Abbreviate journal names in the style used by the National Library of Medicine as in *List of Journals Indexed in Index Medicus*. Authors are responsible for the *accuracy and completeness* of their references. When it is essential to cite personal communications reports, these should be so designated in parentheses in the text along with the full name and affiliation of persons cited other than the authors themselves, and *should not* be included in the list of references.

*Proprietary names of drugs or chemicals* may be used in conjunction with the generic name when the substance is first mentioned in the abstract and in the body of the article. The generic name should be used elsewhere.

*Symbols and common abbreviations* should be used freely and should conform to the *CBE Style Manual*; others should be kept to a minimum and preferably be limited to the tables where they can be explained in footnotes. The inventing of abbreviations is not encouraged—if they are thought essential, their meaning should be spelled out at first mention.

Manuscripts are copy-edited for clarity, conciseness, and for conformity to *Journal* style.

*Page charges.* For papers describing original research the subvention charge is \$100.00 per page.

*Cost of reprints.* When the cost of reprints must be known in advance of publication the Editor will be glad to furnish an estimate. A price list and an order blank will be sent to authors with page proofs.
