

Libyan hospitals preparation for the new corona virus and knowledge of health care worker

1.1. Age:

1.2. Gender: M / F

1.3. Department:

Emergency - ICU – Infectious – Respiratory - Other department

1.4. Years of experience:

1.5. Please choose sources of information for the COVID19 outbreak?

(Select all that apply)

- Media (TV, Radio)
- Social networks (Facebook)
- Training courses
- Colleagues
- Official sources (MOH, CDC)
- Other (please specify)

1.6. Have you ever experienced an outbreak (e.g., SARS, MERS, bird flu, other respiratory) infection outbreak,) in the past? (select all that apply)

No
SARS
MERS
Bird flu
Others:

2.1. Which of the following are symptoms of COVID19? (Select all that apply):

- Fever
- Cough
- Runny nose
- Sore throat
- Shortness of breath
- Joint/muscle pain
- Red eyes
- Rash
- Diarrhea
- Can be asymptomatic

2.2. Which of the following tests should be done for diagnosis of COVID19? (Select all that apply)

- Real-time PCR with respirator samples
- Real-time PCR with serum sample
- Chest X-ray
- Other (please specify):

2.3. Do you keep up-to-date on the latest information about case definitions for COVID19?

Yes / No

2.4. Upon admission, which of the following information are needed to identify patients at risk for having Corona virus infection? (Select all that apply)

- The presence of diarrhea
- The presence of respiratory infection
- History of travel to areas transmission of 2019-nCoV
- History of contact with possible infected patients

2.5. Which of the following measures should be done to prevent transmission of COVID19? (Select all that apply)

- Frequently clean hands using alcohol-based hand rub or soap and water
- Eating boiled and cooked food
- Put facemask on known or suspected patients
- Isolate known or suspected cases in adequately ventilated single rooms
- All health staff members wear protective clothing
- Avoid moving and transporting patients out of their area unless necessary
- Routinely clean and disinfect surfaces contact with known or suspected patients

2.6. Do you know the Personal Protective Equipment (PPE) to protect from COVID19?

Yes / No

2.7. Is alcohol-based hand rub effective for killing Corona virus?

Yes / No / I don't know

3.1. Have you participated in any training course for outbreak management?

Yes / No

3.2. Is there a protocol of triage and isolation for patients with symptoms suspected of COVID19 in your hospital?

Yes / No / I don't know

3.3. Is there any Airborne Infection Isolation Room (AIIR) available?

Yes / No / I don't know

3.4. Do you consider yourself prepared to manage the COVID19 outbreak?

Yes / No / I don't know

3.5. Do you consider your hospital prepared for the COVID19 outbreak?

Yes / No / I don't know

3.6. In case of contact with possible COVID19 patients, do you know how to use personal protective equipment?

Yes / No

3.7. In case of contact with confirmed COVID19 patients, do you know how to perform isolation procedures on the patients to minimize chances for exposure?

Yes / No

3.8. Do you know where to take the report form and how to report a potential COVID19 case or exposure to infection control and public health officials?

Yes / No

3.9. Do you know what to do if you have signs or symptoms suspected of COVID19?

Yes / No

3.10. Do you know safety precautions with aerosol and standard precautions when treating COVID19 patients?

Yes / No

3.11. Do you know the criteria to guide evaluation of persons under investigation (PUI) for COVID19?

Yes / No

4. To what extent are you confident in handling suspected Corona virus patients?

- No confidence
- Little confidence
- Confident
- Very confident
