The images show the distribution of antibody levels (in AU) for various antigens: AMA-1, MSP-1(19), MSP-1(42), EBA-175, EBP-2, GLURP-R2, MPS-3, and GLURP-R0. The graphs illustrate the number of samples across different antibody levels for age groups: <5 years (n = 323 samples), 5-15 years (n = 632 samples), and >15 years (n = 1764 samples).
