Supplemental fig – 1: BAL cytology - neutrophil predominant picture in a background of proteinaceous material on – Periodic Acid Schiff (Left) and May Grünwald Giemsa stain (Right); case-1
Chest Radiograph

Supplemental fig – 2; S2 : Chest radiograph (PA view) of case-2 showing bilateral central mid and lower zone predominant alveolar opacities more on the left side as compared to the right side
Supplemental fig – 3; S3 : HRCT Chest of case-2, showing bilateral diffuse ground-glass haziness with a network of smooth interlobar septal thickening with a crazy-paving appearance more on the left side as compared to the right side of the chest.
BAL

Supplemental fig – 4; S4 : Milky white bronchoalveolar lavage (BAL); case-2
BAL - STAINS

Supplemental fig – 5; S5 : BAL cytology - neutrophil predominant picture in a background of proteinaceous material on – Periodic Acid Schiff (Left) and May Grünwald Giemsa stain (Right); case-2
TBLB - stains

Supplemental fig – 6; S6 : Smears showing granular eosinophilic amorphous material in alveoli on - Periodic Acid Schiff stain – Magentophilic (Top left corner), H&E stain (Top right corner), Masson’s Trichrome stain (Bottom left corner), H&E stain (Bottom left corner).
